BUY BONDS IS BEING FOUND OUT, MARKED

Stigma Will Remain Upon the Slackera Long After the War Is Over.

One by one the men who have re fused and are refusing to buy Liberty Bonds are being found out.

They had an easier time of it when way. The country was not in such deadly earnest about this war as it is now. We were taking for granted that everyone who could would be glad to buy a bond and buy just as many as possible.

People dld not look as closely for the button on the coat and for the Liberty Loan flag in the window as they are looking now. Tite man who walks the streets now without some visible Belien, Ralph Berry, Mrs. Ethel O. sign and emblem that he is a boad purchaser is followed by eyes that grow angry as they watch him. The bouse in any neighborhood that to without a bond flag in its window is a marked house. People stare at it curlously. They eye it resentfully.

Won't Be Forgotten, The bond slacker is a marked man ham, F. P. Payne, F. F. Dean, J. F. in any community. He is being remembered by his neighbors. Nor will bis sins against patriotism and loyalty be soon forgotten. The memories of this war will live a long time. It is always so with wars and what comes after them. He will be pointed out as long as he lives. The memory of his failure and his weakness will be held against his children.

There are some places where the man who fails to buy is being ostracised by his neighbors and his old friends. If they know he is able to buy they are not asking for nin rea sons. Reasons are not asked. It is sufficient that a man failed when bis time came, when the opportunity was offered.

With the whole nation working as it never worked before to raise the most gigantic war loan in all history, the man who does not buy ia finding it interred in the Cloverport cemetery, harder than ever to bide his abortcomings. He is being found out and in the vast majority of cases the proper punishment ia being applied by

State wide calls have gone to save Camp Henry Knox at Stithton for Kentucky. The authorities at Washington have served notice on Kentucky that if they cannot produce the necessary laborers to complete the work at Stithton before cold weather sets in the permanent artillery camp, representing an investment of probably \$20,000,000, will be withdrawn from the state entirely.

Immediately upon receipt of these advices the state officials got busy and are sending out calls to all individuals and business organizations, pointing out the emergency and frankly declaring that if Kentucky carpenters and laborers do not volunteer for the work, a forcible draft must be made effective at once on non-essentials industries.

ULTIMATUM ISSUEDI

Work at Camp Knox has dragged for lack of men and winter time is now approaching with thousands of the soldiers still in tents at Camp Taylor and West Point. The Ultimatum is that barracks to hold not less than 30,000 men and stables for 15,-000 animals must be completed by December 1. DON'T WAIT TO BE DRAFTED!

VOLUNTEER AS PATRIOTS FOR GOVERNMENT WORK!

Carpenters 60c, Laborers 35c per hour

LODGING FREE

The Government at Washington has called upon the citizens of KENTUCKY at once to furnish the men to build -or lose from the State entirely—the wonderful Camp Henry Knox, at Stithton, designed to be the greatest Artillery Training Camp in the United States.

The credit and good name of the Commonwealth of KENTUCKY must be upheld. And the State MUST NOT lose this great plant, calling for an investment on the part of the United States Government of from \$15,000,000 to \$20,000.000.

Up to this time the work has lagged for want of men. It is now up to the men of Kentucky to volunteer, or be forced to do so later on. There is no middle course.

TEN THOUSAND WORKMEN MUST COME FORWARD!

CARPENTERS AND LABORERS

Wages are high and are fixed by the Government. Carpenters 60 cents an hour. Laborers 35 cents an hour. Carpenters and laborers work ten hours each day, receiving pay for eleven hours. Saturday afternoon and Sunday work (not compulsory) double pay for carpenters; time and half for laborers.

Free Sleeping quarters provided with new cots and blankets. Meals 30 cents each. Transportation free to laborers and charges are advanced to carpenters from any point in the State.

SANITARY CONDITIONS ARE OF THE BEST

Camp Knox was selected for a permanent site because it is located on the highest point of land on the Illinois Central between Louisville and New Orleans. Camp Knox has one of the best health records in the country.

PATRIOTIC WOMEN OF KENTUCKY

See to it that every able-bodied man in the State, not engaged in other War Industries, volunteers his services at high pay, to help get this great permanent Kentucky camp ready for the brave boys of this Commonwealth and other States, not billeted in tents at Camp Taylor and West Point, so they will not have to suffer the privations of General Washington and the Continental Army at Valley Forge.

If it is not your own son who must be housed at Camp Knox this winter, it is the boy of some other mother—all of them training to protect our Liberty in the great fight for Freedom.

Provided men do not volunteer for this well-paid and necessary. patriotic work, it is the duty of every loyal Kentucky woman to report them to the nearest United States Employment Service, just as they would a Hun Spy or an Army Slacker.

Show them their Duty!

Make them Volunteer!

Take their Places!

CAMP KNOX MUST BE READY DECEMBER 1

Before cold weather sets in barracks at Camp Knox to shelter not less than 30,000 Army Boys, and stables for at least 15,000 animals must be completed. This is imperative.

Full-blooded Kentucky co-operation can complete quarters for not less than 50,000 soldiers and 30,000 animals in that time, if all work together. It is a man-sized job, all right, even for Kentuckians, but it can be done, as Kentuckians never fail in what they undertake.

The fair name of the old Commonwealth—the Fourteenth State to be admitted in the Union-is at stake in the National Capitol and before the Country at large.

EMPLOYERS—NOTICE—IMPORTANT

If your work is non-essential, give up some of your men at once and advise them to go to Camp Knox. If the call for Volunteers is not heeded you may be required to shut down completly. We do not wish to do this by complusion.

This is no time for shilly-shallying. We must have ACTION. The work is Vital. It is Imperative.

Be a Volunteer and Go at Once!

MEN, MEN AND MORE MEN TO SAVE KENTUCKY!

This is an EMERGENCY necessitating drastic action if the call for volunteers is not heeded.

When the order came from Washington telling what Kentucky had to do to save Camp Knox for the State, Federal Director Pratt Dale, of the United States Employment Service for Kentucky, immediately held a War Council of affiliated interests, composed of Major W. H. Radcliffe, Constructing Quartermaster at Stithton: John Griffiths & Son Company, builders of Camp Knox for the Government, and O. L. Taylor, District Organizer of Kentucky, United States Public Service Reserve; Edward W. Hines, State Chairman, State Council of Defence. Determined action was decided on. All Government agencies will be invoked to secure the necessary men.

Let the word go out broadcast of Kentucky's need of men in this greatest of humanitarian war works-housing our soldiers.

Let it go out at once.

Preach it from the Pulpit.

Shout the need from the housetops.

Organize the Workers at once-and report them to your nearest United States Employment Service or to your County Chairman, United States Public Service Reserve.

IT CAN BE DONE WITH YOUR HELP

Georgia furnished 5,000 men to save its pieric acid plant-raised them in two weeks. Kentucky cando even better.

Major Radcliffe says: "Every nail you drive, every brick you lay, every bit of real work done, will add to the growing load around the Kaiser's neck. The war won't wait!"

Perhaps no document proceeding from the President's capable intellectuals has ever gone so swiftly to the heart of the question or disposed with such candid and yet subtle dialectic skill of a dangerously plausible trick of the emeny's diplomacy as his reply yesterday, through Mr. Lansing, to Prince Maximilian's peace proposals.

Ten thousand words of amplification could add naught to this incomparably effective response. It argues nothing, it promises nothing, but serenely and without the least bluster of a. rhetorical phrase it hamstrings the Kaiser's stalking horse.

"We are ready to accept your well known terms of peace as the basis of negotiation," said Prince Maximillian. you mean that you accept those well known terms?" replies

"We propose an armistice while the negotiations are go- get possession. ing on," said Prince Maximillian. "There can be no armistice," replies the President, "while you have invaded."

"We are ready for parley with a view to peace," said Prince Maximilan. "Of whom are you speaking?" replies the sticks of tobacco in one day. He is a President. FOURTH LIBERTY LOAN.

The above was copied from one of the Liberty Loan posters and is self explanatory.

Kentucky is facing crucial moments in its history right now in its effort to get the great army camp at Stithton completed before Dec. 1. Elsewhere in this issue of The Breck- Henry, Owen, Grant and Carroll. enridge News is a page ad calling for men to volunteer their services in building Camp Knox, and unless enough men do volunteer, they will be drafted or else Kentucky will loose the right of having the camp.

We should dislike very much to see Kentucky fail in this to France during the past three magnanimous undertaking and it should not be necessary at all years, for the horses and mules for to draft the men to work when there are plenty of them who the war is 59,000,000. are holding "white collar" jobs and whose places could be taken by women. Then as the farmers complete their work of harvesting the crops and sowing the fall wheat, and if they are cattle, \$15; hogs, \$19.95; sheep, \$11; not large stock owners, theytoo can join the ranks of carpenters lambs, \$15,25. and help complete Camp Knox. It is imperative that the week of 1917 the averages were: catsoldiers on the Artillery Range abandon their tents before cold weather and it is for us to see that they do get into their quarters and are made comfortable for the winter.

Epidemio Probably Not Spanish in Origin-Germ Still Unknown-People Should Guard Against "Droplet Infection"-Surgeon General Blue Makes Authoritative Statement.

Washington, D. C .- (Special.) -Although King Alfenso of Spain was one of the victims of the influenza epidémic in 1893 and again this summer, Spanish authorities repudiate any claim to influenza as a "Spanish" disease. If the people of this country do not take care the epidemic will become so widespread throughout the United States that soon we shall hear the disease called "American" Influ-

Since that time there have en numerous epidemics of the disse. In 1889 and 1890 an epidemic If influenza, starting somewhere in the rient, spread first to Russia thence over practically the entire civ-Illzed world. Three years later there was another flare-up of the disease. Both times the epidemic spread wide-

ly over the Ualted States. "Although the present epidemic is called 'Spanish Influeuza,' there is no eason to believe that it originated in Spain. Some writers who have studied the question believe that the epidemic camo from the Orient and they call attention to the fact that the Germans mention the disease as occurring along the eastern front in the summer and fall of 1917."

How can "Spanish Influenza" be rec-

ognized? "There is as yet no certain way in which a single case of 'Spanish lafluenzn' can be recognized. On the other hand, recognition is easy where here is a group of cases. In contrast o the outbreaks of ordinary coughs d colds, which usually occur in the cold months, epidemics of Influenza may occur at any season of the year. Thus the present epidemic raged most Intensely in Europe in May, June and July. Moreover, in the case of ordipary colds, the general symptoms fever, pain, depression) are by no eans as severe or as sudden in their onset as they are la influenza. Finaly, ordinary colds do not spread brough the community so rapidly or o extensively as does lafluenza.

"In most cases a person takea sick with influenza feels sick rather sudienly. He feels weak, has pains in the eyes, ears, head or back, and may be re all over. Many patients feel izzy, some vonit. Most of the palents complain of feeling chilly, and with this comes a fever in which the emperature rises to 100 to 104. In ost cases the pulse remains relative-

It is possible that the inborntory lavestigations now being made through the National Research Council and the United States Hygienic Laioratory will furnish a more certain way to which ladi-U. S. > What is the course of the disease? Do people die of it?

"Ordinarily, the fever lasts from three to four days and the patient recovers. But while the proportion of dentils in the present epidemic has generally been low in some places the outbrenk has been severe and deaths have been aumerous. When death occurs it is usually the result of a com-

What causes the disease and how is It spread?

"Hacteriologists who have studied in fluenza epidemics in the past have found in muny of the cases a very Small rod-shaped germ called, after its discoverer. Pfeiffer's hacilius. In other cases of apparently the same kind of disease there were found pneumococcl, the germs of lobar pneumonia. Still others have been caused by streptococcl, and by others germs with long

"No matter what particular kind of germ causes the epidemic, it is now believed that influenza is always spread from person to person, the germs being carried with the air nlong with the very small droplets of mucus, expelled by coughing or sneezing, forceful talking, and the like by one who already has the germs of the disease. They may also be carried about in the air in the form of dust coming from dried mucus, from coughing and sneezing, or from chreless people who spit on the floor and on the sidewalk. As in most other catching diseases, a person who has only a mild attack of the disease himself may give a very severe attack to others."

What should be done by those who catch the disease?

"It is very important that every person who becomes sick with influenza should go home at once and go to bed. This will help keep nway dangerous complications and will, at the same time, keep the patient from scattering the disease far and wide. It is highly desirable that no one be allowed to sleep in the same room with the pa-In fact, no one but the aurse should be allowed in the room.

"If there is cough and sputum er running of the eyes and nose, care should he taken that all such disclurges are collected on hits of gauze or rag or paper napkins and burned. If the patient complains of fever and headache, he should be given water to drink, a cold compress to the forehead and a light sponge. Only such medicine should be given as is prescribed hy the doctor. It is foolish to ask the druggist to prescribe and may be dangerous to take the so-called 'safe, sure and harmiess' remedies advertised by patent medicine manufacturers.

"If the patient is so situnted that he can be attended only by some one who must also look after others in the family, it is advisable that such attendant wear a wrnpper, apron or gown over the ordinary house clothes while in the sick room and slip this off when leaving to look after the others.

"Nurses and attendants will do well to guard against breathing in dangerous disense germs by wearing a simple fold of gauze or mask while near the

Will a person who has had influenza before catch the disease again?

"It is well known that an attack ef measles or scarlet fever or smallpox usually protects a person against another attack of the same disease. This appears act to be true of 'Spanish Influenza.' According to newspaper reports the King of Spain suffered nn attack of influenza during the epidemic thirty years ago, and was again stricken during the recent outbreak in

How can one guard against influenza?

"In guarding against disense of all kinds, it is important that the body he kept strong and nbie to fight off disease germs. This can he done hy having a proper proportion of work, plny and rest, by keeping the body well clothed, and by enting sufficient wholesome and properly selected food. In connection with diet, it is well to remember that mllk is one of the hest all-around foods obtainable for idults ns well as children. So far ns n disease like influenza is concerned, health authorities everywhere recognize the very close relation between its spread and overcrowded hemes. While it is not always possible, especially in times like the present, to avoid such overcrowding, people should consider the health danger and amke every effort to reduce the home overcrowding to a minimum. The value of fresh air through open windows cannot be

"When crowding is unavoidable, as in street cars, care should be taken to keep the face so turned as not to inhale directly the air breathed out by another person.

"It is especially important to bewaro of the persen who coughs or sneezes without covering his mouth and nose. It also follows that one should keep out of crowds and stuffy places as much as possible, keep homes, ollices and workshops well aired, spend some time out of doors each day, walk to work if at all prncticable-in short, make every possible effort to breathe as much pure air as

"In all health matters follow the advice of your doctor and obey the regulations of your local and state health

officers. "Cover up each cough and sneeze If you don't you a spread disease."

HONOR EMBLEMS AS STICKERS

To Be Displayed to Show Percentage of Subscriptions Among Employes.

There will be no honor flags distributed to communities, counties or states in the Fourth Liberty Loan campaign in the Eighth Federal Reserve District.

Instead, the Honor Emblem of the Fourth Liberty Lonn is to be used for display by factories, stores, organizations, etc., to show the percentage of their employes or members which subscribe to the Fourth Liberty Bonds.

The Honor Emblems are printed showing the percentage 75 per cent, and stickers are furnished showing the percentage 80 per cent, 85 per ceat and up to 100 per cent. These stickers can be placed on the card over the 75 per cent in accordanc, with the percentage of employes or members sub-

scribing. The Honor Emblous are printed on both sides, so that they may be seen beth inside and outside in case of a wludow display. Samples of the Honor Emblems can be secured from the Publicity Director, who will also supply you with such quantities as you may need of same.

The purpose is to try and get 100 per cent subscriptions from employes and members of organizations, and to award them with the Honor Emhlems in accordance with the percentage of their results.

World news is all right, but OUR BOYS want NEWS OF THIS TOWN. They want the home newspaper. Publishers are prevented from sending their papers free to anyone, even boys in the service. Consequently a national movement has been started by Col. William Boyce Thompson of New York, who is acting as President of the Home Paper Service of America to give the boys what they are calling for. Every community is joining the movement. Let us see that our hoys are not forgotten.

Send to the publisher of this newspaper whatever amount of money you can-5 cents or \$50.00. We will publish a list each week of those contributing, and the amounts contributed.

Every cent received will be used to send this paper to our boys at the front. If at the end of the war, there is any surplus, it will be turned over to the local Red Cross Committee.

There is no profit in this to the publishereven in normal times, subscriptions are not sold at a profit. With war prices prevailing, and the high rate of postage on papers sent to France, our cost will scarcely be covered by our full subscription price.
